SUMMARY

Graduated with a Master's Degree in Computer Science from National Taiwan University, with internship experience at LINE Corp's blockchain product - DOSI Store. focusing on developing Cloud Native Applications. Founder and president of the Developer Student Clubs, demonstrating a passion for learning and sharing new technologies with peers. Committed to solving real-world problems in a short period of time through participation in hackathons.

EDUCATION

Master of Computer Science, National Taiwan University 2021-2024
Overall GPA: 4.12/4.3
Relevant Coursework: Blockchain and Big Data, Introduction to FinTech, Multimedia Security, Computer Vision

EXPERIENCE

Software Developer Intern 2022 - 2022
Line Corporation (95M MAUs worldwide, social media company in Asia) Taipei, Taiwan
(Blockchain, React, Nx, Kubernetes, Swagger, Python)

- Swagger TypeGen Service
  - Situation: The existing API development process was inefficient and lacked a single source of truth.
  - Action: Design a service utilizing Swagger, auto-gen types, and Kubernetes deploy with DNS/LB.
  - Result: Increased API development speed by XX%.
- Built a scalable frontend using Nx in monorepo and collaborated with the Korean Backend/Planner team.
- Hackathon: Led 5 developers to build an NFT merchant management system (NextJS/Spring Boot).
- Sharing: Gave internal talk on Ethereum & dApp development.

SELECTED PROJECTS AND COURSES

Decentralized Ticketing System, Web3 Project
Master's Thesis (Data Analysis, Solidity, TypeScript, React Native, Python, IPFS, GunDB, SQL, NextJS)

- Situation: Scalper raising prices leads to inflation, hurts event revenue, and prevents fans from buying tickets.
- Action: Simulate customer response to 3 ticketing strategies, analyzing stakeholder gaming for each.
- Result:
  - Reduced price fluctuations by 9X%, eliminating scalpers profit (1XX%)
  - Decentralized Ticketing App with 9X% BDD code coverage.
- In progress: Add Fixed Price ticket purchase feature with Apache Kafka.

Rate My Professors TW, Full Stack Project
Side Project (NextJS, MVC, CI/CD, Web Crawling, NodeJS, MongoDB, PWA, Huggingface, LLM, NLP)

- Data: Increased the crawling speed by 80% using asyncio and aiohttp.
- Backend: Initially developed with Express MVC, later migrated to FastAPI Swagger.
- Frontend: Initially used Pug, now using NextJS with course scheduler, rating system, and PWA support.
- In progress: Add LLM+RAG, NLP, and VectorDB features to Build Modern GenAI Applications.
- Future: Rewrite some API to Golang, gRPC, and make an Android App.

Intel Certified Developer—MLOps Professional
Course, ML (Mlflow, MLOps, LangChain, FastAPI, Scikit-Learn)

Pair-Programming-with-a-Large-Language-Model - DeepLearning.ai
Course, GenAI (Gemini)

HONORS

Research Excellence Award

- Recognized for outstanding research contributions, placing among the top 1% of graduating students.

Intel Andy Grove Scholarship

- Recognized as a top scholar (18%, 367 selected) for my academic achievements and potential.

College Student Research Scholarship

- Awarded a prestigious scholarship by the Ministry of Science and Technology, Taiwan.

EXTRA-CURRICULAR ACTIVITIES

Developer Student Club Leader (2019-2021) - Advisor by Yuh-Pyng, Shieh, and Google Developers

- Chosen as top 800 leader from 3000+ global applicants for 2-year peer learning program.
- Led the club, engaging over 73 students with talks on Deep Learning, PoseNet, Python & Colab, and Flutter.

ACM Competitive Programing Club Leader (2017-2021) - Supervised by Jeng-Sheng Yeh

- Enhanced programming skills through practice and problem-solving on platforms like UVa Online Judge.

Volunteered at exhibitions

- Provided technical support at the ART FUTURE exhibition showcasing blockchain applications.
- Assisted with Developer Student Club (DSC) and Google Developer Groups (GDG) events at SITCON(Student Information Technology Conference) and COSCUP(Conference for Open Source Coders, Users and Promoters).

PUBLICATIONS

- Sung, H.-M., Chen, T., **Tseng, H.-C.**, Prayogo, B., Lin, J.-Y., & Hung, Y.-P. (2023). **akaTick: Hybrid Mobile E-Ticketing System Based on Non-Fungible Tokens**. 2023 IEEE International Conference on Metaverse Computing, Networking and Applications (MetaCom), 686–687.

SKILLS

- Artificial Intelligence(GenAI, LLM, NLP, CV, ML/DL), Web(Frontend/Backend) Development, Cloud-Native Applications, Socket, Chrome Extension, SSG/SSR, MVC,
- Python, C/C++, JavaScript/TypeScript, Java
- Huggingface, ChatGPT, FastAPI/Flask, NodeJS, React(NextJS, React Native), Tensorflow, Scikit-Learn, OpenCV, OpenGL, Numpy, Pandas, Matplotlib
- NoSQL(MongoDB), SQL(PostgreSQL, MySQL), p2p(orbitDB, GunJS), IPFS, Vector(Weaviate)
